## General information

Against the backdrop of progressive dynamism, the qualification of (future) managers in the social and health care sector, especially in the areas of organizational and personal development, is gaining a sustainable role. This concerns business aspects as well as the corporate culture itself. The Master's program „Theology and Ethics in Social and Health Care“ is aimed at students with a first academic degree (Bachelor) in theology, humanities and social sciences and interested parties from the social and health care sector who wish to pursue a career in the social and health care sector.

### You are looking for ...

- a future- and demand-oriented academic qualification
- a broad interdisciplinary approach to current topics in the social and health care sector
- an established and broadly networked university with diverse social and cultural offerings

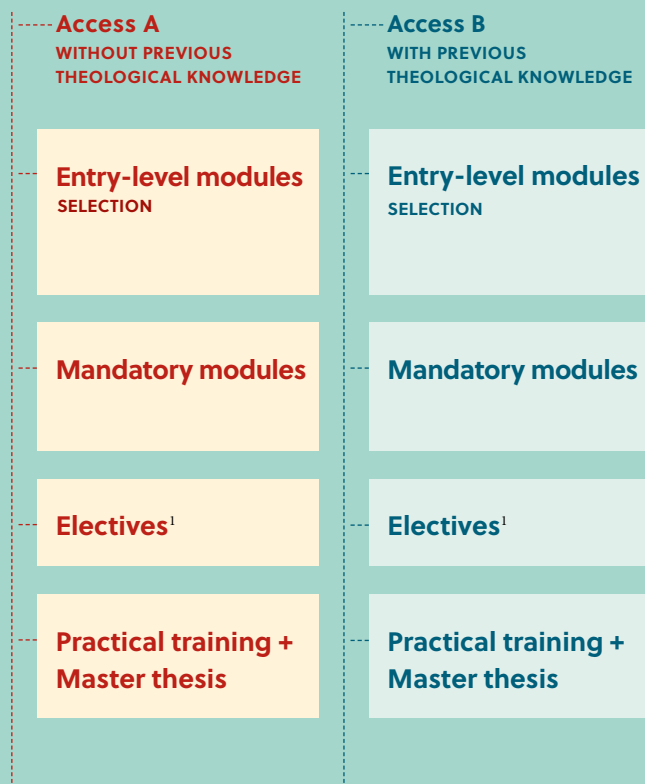

### We offer ...

- a modular concept that combines presence and self-study units
- high practical relevance, cooperation with supra-regional institutions in the social and health care sector
- small learning groups and individual support
- close connection between teaching and research

### Your job prospects

- Staff positions and tasks in middle management
- Activities as for staff and organization developer
- Ethics advisor/coordinator for denominational sponsors and foundations

## Module design/structure

*Language of instruction:* German, if necessary individual courses in English, *language certificate for international applicants:* level C1 for German; for level B2 for German there is the possibility to provide the proof of German language skills required for enrollment by passing the DSH examination at the University of Trier.

<sup>1</sup> interdepartmental from the offers of the University of Trier (see above)

## Insights into the study

The Master's program in Theology and Ethics in Social and Health Care is divided into 10 modules. The following selection should give you a first idea of some exemplified modules:

### Example: Entry-level modules

*The question of God*

The module imparts a sound basic knowledge of the Old Testament image of God and of the revelation of God in life, work and message of Jesus. From the perspective of philosophy, the possibilities of recognizing God and speaking about God are also illuminated in a fundamental way.

### Example: Mandatory modules

*Fundamentals of Leadership and Management*

The module provides insights into leadership styles and organizational models, concrete techniques and methods for project planning, development of staff and organization and much more.

### Example: Practical training + Master thesis

*Master thesis, internship and workshops*

The workshops impart advanced methodological, technical and social skills. The internship provides an in-depth insight into future fields of work and serves as the basis for the master's thesis.
